

### Physical Education / Games

Children will participate in OAA and team building activities, focussing on working collaboratively, orienting and reading simple maps. Children will take part in lessons focussing on striking and fielding, developing and applying these skills to Rounders'.  
With CM Sport, Children will also take part in athletic activities, being taught a variety of effective running, jumping and throwing techniques in isolation and combination.

### French

Who doesn't love food? Children will be introduced to new vocabulary linked to foods. We will continue using 'Salut' to enhance the quality of teaching. To end the unit, the children will be given the opportunity to make French toast, following instructions written in French.

### Design and Technology

What better way to learn about how the Roman's made things than by finding their inner carpenter and creating their own mosaic wooden photo frame?!

Children will use a range of designing, measuring, cutting and joining techniques to create their final product.

### Computing:

We are music makers! During this term, we will be exploring different ways to use technology to make music. We will be using apps called Isle of Tunes and Garage Band to use pre-set sounds to make compositions. We will also look at a programme called Audacity and how it can be used to record and compose musical masterpieces! We will also be continuing with our We are E-Safety Legends! unit.

### Religious Education:

Children will be learning about the importance of ceremonies, both religious and non-religious, and their value within different religions. With a particular focus on funerals, the children will be given the opportunity to visit Sheet church where they will take part in a talk on the importance of the ceremony for Christians. Due to the nature of the subject, and the sensitivity needed, this talk is given extremely tactfully and appropriately for the age of the children.

### PSHE:

Children will be returning to the key unit of Keeping Safe. In addition to this, children will be learning and discussing the importance of Economic Wellbeing, preparing for their futures and understanding what steps they can take now to ensure success in later life.

### Art:

Prepare to get messy!  
During this theme, the children will explore different sculptures and techniques used for sculpting. Children will apply these skills when making their very own Roman Pottery!

### Geography:

Whilst learning about the Roman Empire, the children will discover where the Romans originated, invaded and conquered. The children will locate these places on a map and discuss the importance and impact that it has had on the world today.

### Music:

Children will continue to develop key terminology used within music, including composer, score and conductor. Children will study the composer John Williams and will learn about his life, listen to and compare pieces of his music and compose their own score using John Williams as their inspiration. Children will also have the opportunity to perform to the rest of the class.
