

Physical Education / Games

Children will utilise the outdoor space and take part in a range of team-building and OAA activities learning key mapping symbols, following instructions and designing their own orienteering map.

As well as this, children will be taught by CM Sports who will teach 'Invasion' skills. These skills will be linked to sending/receiving (hockey), striking (football) and net/wall (tennis) activities.

French

Continuing from Spring 1, the children will use a French Teaching Program called Salut. This interactive application will be used to teach key vocabulary, learn songs and play games all about Les Animaux (The Animals). In addition to this, we will use videos from the fantastic Mr Innes (found on YouTube) to enhance and embed key learning. In addition, the children will recap and reinforce their learning of numbers to 20 and colours taught in the Autumn term.

Design and Technology

Our yummy DT unit this term is directly linked to our theme. Children are set the challenge of making their very own healthy pasta salad. All children will be given the chance to work through the TASC wheel, ensuring they research, taste test, design, make and evaluate their product. Not only will the children be evaluating their products, but outside critics (their hungry parents!) will also be invited in to taste and evaluate.

Computing:

We are data handlers! Children will be collecting and learning how to present data digitally through charts and pictograms. We will use Excel, Word and J2E to do this. This unit also links brilliantly to our maths topic on presenting and interpreting data. We will also be continuing with our 'We are E-Safety Legends!' unit.

Religious Education:

Children will be looking at the Easter Story, and its true meaning and value for Christians. They will focus on the concept of Belief and will evaluate the importance of belief for Christians and the Easter story, whilst considering the impact belief has on peoples' everyday lives.

PSHE:

Keeping with the theme of healthy lifestyles, children will be asked to discuss the importance of mental health and the effects it has on people. Sleep and an effective bedtime routine is an important part of this and is taught through our theme. We will also be looking at the importance of everyday hygiene routines to limit the spread of germs and infections. In addition to this, we will be covering 'People and their work' where we ask any willing parents or family members to come into school and give a short presentation on their jobs. This will expose the children to all types of possibilities for their future and hopefully inspire and motivate children to work towards their chosen career.

Art:

Children will be exploring the artist David Hockney, focussing on his use of colour and landscape drawing. Children will appraise famous pieces of artwork and have the opportunity to create their own artwork in this style.

History:

N/A

Music:

The children will continue to learn, practise and enjoy a variety of playground games. They will adapt known games, songs and chants and create their very own, building a bank of resources to draw from during their own free time.
