## Terrible Tornadoes

- Tornadoes are sometimes called twisters. They are
- very large and fast spirals of air that come from
- a thunderstorm on the ground. They are often
- grey in colour and look like an elephant's trunk
- spinning from the sky to the floor. Tornadoes can
- have wind speeds of up to three hundred miles-
- per-hour so they can cause a lot of damage.
- They can easily destroy
- buildings, large pull
- trees out of the ground
- and can even carry
- cars through the air for
- a long distance. Most
- tornadoes only last for a
- few minutes but no one
- quite knows how or why 102
- they stop. 104
