

# Great Galapagos

11 Thank you for joining us today; my name is David and  
22 I will be your tour guide. The Pacific Ocean and the  
30 enchanted volcanic islands of Galapagos are places unlike  
40 any other. They are home to an incredible collection of  
49 animals who have adapted to the harsh landscape around  
58 them. Most of them were discovered by an astounded  
69 Charles Darwin on his first trip to these islands over two  
72 hundred years ago.

83 On our right, you can see one of the islands' most  
90 remarkable inhabitants – the giant tortoise. There are  
102 hundreds of them on the beach at any time, lying in the  
112 sun to warm their blood and gather energy. Many may  
124 be older than you are right now and some will live for  
130 over one hundred years. Impressive, right?

# Quick Questions

1. Who discovered most of the animals on the Galapagos Islands?

---

2. Sum up the second paragraph in 20 words or less.

---

---

3. How has the author made the Galapagos Islands sound special within the text?

---

---

4. Name one other creature you could expect to see on this tour.

---
